SUMMARY

I'm a driven and self-taught full-stack developer with experience in web applications. Skilled in front-end and back-end technologies, including React.js, Javascript, HTML5, CSS3, Node.js, WordPress, Python, database, and Salesforce. I'm committed to learning best practices for writing clean and maintainable code to deliver high-quality software solutions and to style websites and mobile websites as well as possible for a better User Experience.

WORK EXPERIENCE

Trainee
Globant, São Paulo | Dec 2021 - July 2022

It was a remote position our team was driven by a supervisor and Globers from worldwide to work together in order to learn SAP but later we were relocated to learn Salesforce Lightning Platform Architecture to develop and design Custom apps in Salesforce platform.

Salesforce Experience: - Trail Developer Beginner - Platform Development Basics - Data Modeling - Data Management - Data Security - Formulas and Validations - Salesforce Flow - Salesforce Mobile App Customization - Apex Basics & Database (SOQL - SOSL) - Apex Triggers, Apex Testing - Developer Console Basics, Search Solution Basics - Process Builder

Trailblazer id: https://trailblazer.me/id/dmendesdealbuquerque

EDUCATION

B.S. Computer Science
Nove de Julho University - São Paulo,SP
June 2017 - June 2021

CERTIFICATIONS

Coursera: Python for Data Science and AI (nov 2022)
The basic Python data structures: list, set, tuples, and dictionary with core libraries for data science (matplotlib, Numpy, Pandas)

Coursera: REST APIs with Flask and Python (nov 2022)
REST APIs with Python, Flask, Docker, Flask-Smorest, and Flask-SQLAlchemy

PROJECTS

React-Movie-Project Built using React.js, Node.js - Basic application using API data from omdbapi.com, some react hooks, and CSS3 properties for a fully mobile responsive page.
https://github.com/DanielAlbuquerq/React-Movie-Project

Form Page: Built using HTML5, CSS, and Javascript used to validate input values.
https://github.com/DanielAlbuquerq/Form_Project

Gallery Page: Built using HTML5, CSS3, and SASS - The main focus of this project was to explore CSS3 and Sass syntaxes.
https://danielalbuquerq.github.io/Gallery_project/

My Suggestion to Spotify - For a better UX to deliver a successful experience.
See this project: https://danielalbuquerq.github.io/SpotifyProject/
Do you think it might be a better idea?

E-commerce - Around 2020 to 2021 My friends and I decided to open a dropshipping store using WordPress, ElementorPro, Woocomerce, and external plugins. With these scenarios, we learned a little about SEO, Copyright, Facebook ads - Facebook Pixel, Ecommerce Sales Funnel. We don't have this website anymore, but it was a huge experience to understand more about Ecommerce world.
